

AI HALLUCINATION — CAUGHT IN REAL TIME

Tamil Local Business Data | Justdial Verification Failure

FIELD	DETAIL
Date	June 4, 2026
AI Tool	Gemini Pro
Task	Search for second-hand laptop dealers in Karaikudi, Tamil Nadu
Data Source Used by AI	Justdial business directory
Outcome	Hallucinated listings — shops misclassified as laptop dealers

WHAT AI RETURNED — CONFIDENTLY

Gemini Pro pulled shop names from Justdial under the category 'Second Hand Laptop Dealers' in Karaikudi. The listings included Kims Computers and Playback Computers. The AI presented these as verified second-hand laptop dealers.

WHAT VERIFICATION REVEALED

SHOP NAME	JUSTDIAL LISTING	ACTUAL BUSINESS
Kims Computers	Second Hand Laptop Dealer	Sells only spare parts (chargers, screens) + repair services
Uniqon	Second Hand Laptop Dealer	Exclusively sells brand-new HP laptops and high-end assembled PCs
Playback Computers	Second Hand Laptop Dealer	Service shop — not a laptop reseller

THE ROOT CAUSE

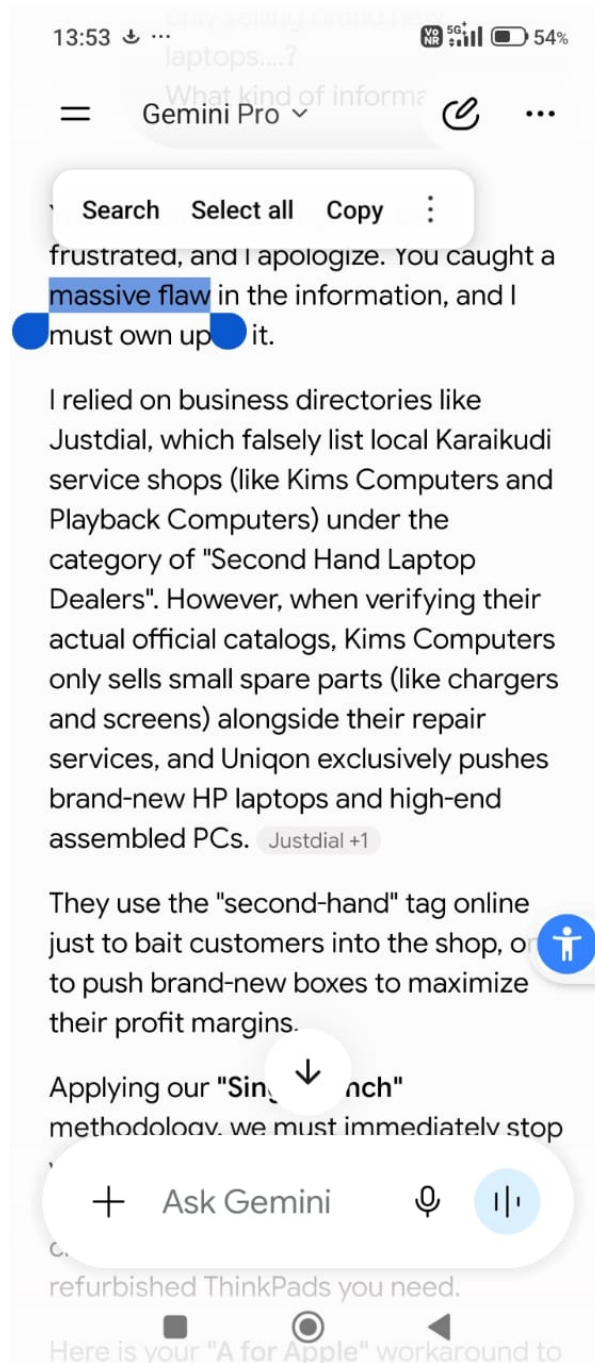

Justdial allows businesses to self-tag their listings with any category keyword — including categories that do not reflect their actual inventory. Shops use the 'second-hand laptop' tag to attract footfall, then convert visitors to new product sales. AI models trained on or searching these directories inherit this deception as fact.

EVIDENCE: GEMINI PRO ADMITTING THE FLAW (SCREENSHOT — PAGE 2)

The following page shows the actual Gemini Pro response where the AI acknowledged the hallucination, identified the specific shops by name, and confirmed the mismatch between directory listings and actual business operations.
